

MICROSOFT INTEGRATES ISA SERVER WITH MONITORING TOOL

March 7 2003

Perth based internet and email monitoring specialist WebSpy Ltd has announced the integration of its internet monitoring tool, WebSpy Analyzer with Microsoft Internet Security and Acceleration Server 2000 (ISA Server 2000).

The agreement is the first between Microsoft and an Australian security software developer.

ISA Server, Microsoft's firewall and web cache server, is designed to help organizations protect, accelerate and control their network access.

WebSpy provides real-time of internet activity to organisations implementing the Microsoft security solution.
